

D Check Developments

D-Check Developments, Inc. is dedicated to the design and manufacture of safe, simple, and cost-effective equipment for our customers in the aircraft and industrial fields.

- Quality, integrity, & reliability are principles of every product we produce.
- Genuine customer service with emphasis on 100% customer satisfaction.
- All products are specifically built for each individual customer.
- Proud manufacturer of American-made tools

D-Check Developments, Inc. was established July, 1997 by Jeffrey Barkes. In August 2009, the company built & moved to a new 12,000 square foot manufacturing facility. Our convenient location to Atlanta International Airport, dedicated professionalism, & strong customer focus, combine to offer you the best products in the industry.

The Omni Arm was invented in 1989 by President Jeffrey Barkes. It replicates the dexterity of the human forearm. Raising, lowering, rotating, and articulating motions are controllable in thousandths of an inch. The Omni Arm removes and installs landing gear in just minutes. The Unit's hydraulic system incorporates an over-weight and over-travel safety trip to prevent damage to the aircraft, landing gear, Omni Arm, and personnel. There are currently over 100 Omni Arms in service with major aircraft manufacturers, MRO's, Commercial Airlines, U.S. & Foreign Military.

Shop Capabilities

- 3 Axis CNC Milling
- CNC Plasma Cutter
- CNC Lathe
- MIG/TIG Welding
- Full Machine, Fabricating, & Weld Shops
- Mastercam & SolidWorks Drafting & Design
